"The Standard of Value and Quality"

When you see this familiar phrase, remember that it is much more than a mere advertising expedient. Paige cars are actually and literally standard of the moderate price field—and they have achieved this distinction through the basic value and quality of the product.

There is no secret about quality manufacturing. Good materials, good workmanship and good facilities are

essential to the production of any good car. It is only necessary to remember that there can be no compromise so far as any of these elements are concerned.

A brief inspection of the Paige Fairfield "Six-46" will make this point clear. You, then, will also understand why this car has been so universally adopted by people of good taste and refinement.
